February 2013

Last year we were delighted to be awarded some land-mark contracts that saw us exceed all our targets. We hope to repeat this success this year by continuing to focus on providing a flexible, competitively priced and professional service to local authorities and our private sector customers.

Vehicles for Cory Environmental's contract with Cornwall Council.

## New Fleet For New Collection Service in King's Lynn & West Norfolk

Our latest customer and one of the UK's leading providers of specialist services to the public and private sector - Kier - has asked us to provide a fleet of vehicles for their new waste collection and recycling service for the Borough Council of King's Lynn & West Norfolk.

Keith Atkins, Fleet Operations Manager, Kier said: "We needed a one-stop solution for the vehicles and their maintenance. The situation in this case was unique because we currently don't have any vehicle workshop facilities in the King's Lynn area.

SFS is well established and a leading provider of municipal vehicles, maintenance services and fleet management.

We selected them on the basis of their pricing, credentials & reputation in this sector. We feel sure they will serve Kier & the Kings Lynn contract very well."

Kier signed an 8-year environmental services contract worth £120m with The East Sussex Waste Partnership to provide recycling, residual and green waste collections together with street cleansing and associated services to four East Sussex councils and serving over 200,000 residents. Starting on 1 April 2013 the new service introduces alternate weekly black bin and recycling collections to the area, as well as new weekly food waste collections.

We are pleased to have been selected as the vehicle and maintenance provider, to facilitate the new service. The contract comprises 18 x narrow-track RCV's from Dennis Eagle with Terberg bin-lifts, 14 of which are fitted with pods to enable collection of kitchen waste, plus a number of smaller service vehicles including MAN caged tippers.
